Short Description

Product Details:

A STAR HAS BEEN BORN

The name Propus is directly taken from the Greek word for "forward foot". The star is located in the constellation of Gemini. Propus is a red giant star, one of very few bright cool stars visible from Earth. It shines about 2400 times stronger than our sun and has become very famous for being the closest star to planet Uranus. Propus is an ecliptic star and sometimes it hides behind our moon or any of the closest planets in our solar system.

MODEL OVERVIEW

Mionix Propus 380 is the physical answer to performance, design and innovation. The new developed surface is treated with a special silver-metallic plastic coating. According to test results, this special coating offers optimal tracking conditions and improves the overall performance of the mouse movements. A thin base made of PVC-plastic has been implemented to give the stability from a hard mousepad without compromising the flexibility from a soft mousepad. The backside is made of natural rubber to ensure a steady grip.

Features:

- Optimal tracking
- Unique silver-metallic plastic coating ensures optimal tracking
- Unique surface
- Fine textured surface for a smoother glide and precise movements
- Extra wide tracking area
- For sweeping movements without interruption
- Hard & flexible
- Unique material combination for durability and feel

Specifications:

- Material: PVC-plastic base
- S.Q.A.T value: 9
- Surface: Ultra-fine texture
- Dimensions: 380mm x 260mm
- Thickness: 4mm
- Back: Rubber based backside for a steady grip
- Compatibility: LED-optical & laser
