- Digital Output
- Digital Input
- Line In (Stereo analog input)
- Line In Volume Control
- Power Switch
- Power Socket

Short Description

The PX5 is the most technologically-advanced headset ever designed for PS3 and XBOX 360 gaming, incorporating a programmable digital signal processor to allow independent customization of the chat, game and microphone signals. Custom presets stored in the headset can be selected during specific parts of the game to emphasize sounds like footsteps or reloads that might otherwise be difficult to hear. It can even be programmed to disguise your voice or to enhance the voices of online players so you can hear them more clearly during intense parts of the game.

Description

Product Details:

The PX5 is the most technologically-advanced headset ever designed for PS3 and XBOX 360 gaming, incorporating a programmable digital signal processor to allow independent customization of the chat, game and microphone signals. Custom presets stored in the headset can be selected during specific parts of the game to emphasize sounds like footsteps or reloads that might otherwise be difficult to hear. It can even be programmed to disguise your voice or to enhance the voices of online players so you can hear them more clearly during intense parts of the game.

The PX5 is also the first headset to incorporate dual radios—one for immersive, Dolby Digital surround sound game audio and

another for chat on the PlayStation Network via Bluetooth. The Bluetooth feature also supports stereo audio streaming for listening to music while playing a game and can also be used to accept phone calls while playing the game.

Although optimized for PS3 and Xbox 360 gaming, the PX5 is also perfect for watching movies and listening to music, with its impeccable audio performance, large, deep, fabric cushions, soft headband, and twist cup designed for resting the headset on your shoulders. The PX5 marks the beginning of a new breed of wireless gaming headset that serves as the ultimate “secret weapon” in the arsenal of serious gamers seeking unmatched audio quality, sonic control and a competitive advantage.

Features

Features:

Engineered For Gaming™

Customizable Presets

Configure up to 18 personalized presets to optimize game, chat and mic audio for different gaming situations.

Dolby 5.1/7.1 Surround Sound

Immersive 360 degree audio lets you hear the direction of every sound, as if you were playing with speakers all around you.

Digital RF Wireless Game Sound

Uncompressed wireless digital audio signal achieves CD-quality game sound that rivals professional-grade wired headphones.

Voice Morphing

Disguise your voice by changing the sound from deep lows to screeching highs.

Dual-Pairing Bluetooth Wireless Chat

Chat wirelessly on the PlayStation® Network, answer mobile phone calls or listen to streaming music from a Bluetooth enabled digital music player while you're gaming.

Dynamic Chat Boost™

Chat level increases automatically as the game volume gets louder, so you can always hear the voices of other players.

Microphone Monitoring

Hear your voice in the headset, so you won't have to shout to hear what you're saying.

Sonic Silencers

Enjoy total silence by eliminating ambient noise pickup on your mic and cutting background noise from PSN or XBOX LIVE® chat sound.

Sonic Lens™ + Sound Field Expander

Widen or narrow the sound field to focus on audio cues that are difficult to hear like footsteps sneaking up on you or the click of someone reloading in the distance.

Interactive Voice Prompts

A voice announces critical headphone status conditions, such as battery low, preset numbers, and more.

Ear Guard™ with Blast Limiter

Limit the intensity of deafening game sounds such as explosions and gunfire to reduce ear fatigue during long gaming sessions.

PS3 and XBOX 360® Compatible

Delivers the ultimate gaming experience with XBOX 360 and PS3 consoles

Specifications

Headphones

- 50mm diameter speakers with neodymium magnets
- Digital Wireless RF carrier reception (2.404-2.476GHz)
- Bluetooth radio with dual-pairing mode and A2DP compatibility
- Frequency Response: 20Hz - 20kHz, >120dB SPL @ 1kHz
- Condenser Microphone Frequency Response: 50Hz - 15kHz
- Headphone Amplifier: Stereo 27mW/ch, THD <1%
- Digital Signal Processor for independently controlled chat, game and mic signals
- USB port for programming the DSP via a Windows XP/Vista/7 computer
- Operates on two (2) AA batteries or two (2) AA rechargeable NiMH batteries
- Automatic shut down after approx 5 minutes of carrier loss or silence to conserve battery power
- Battery booster circuit extends battery life for up to 15 hours
- Weight: 7.9 Oz (233g)

Digital RF Wireless Transmitter

- Digital Wireless RF wireless carrier reception (2.404-2.476GHz)
- Digital RF wireless transmission range up to 30 feet
- Stereo headphone output with volume control for external wired headphones
- Frequency response: 20Hz - 20kHz
- Optical TOSLINK digital audio input compatible with 48kHz digital audio stream
- Optical TOSLINK digital audio output pass-through of digital input stream.
- 150MIPS Digital Signal Processor for Dolby processing
- Maximum analog input level with volume control on maximum setting: 2Vpp (700mV rms). Input sensitivity may be adjusted to accept higher level signals by lowering the volume control.
- Dimensions: Height 8.875 in (22.5 cm), width 4.375 in (11.1 cm), depth 4.375 in (11.1cm)
- Weight: 8.4 Oz (240g)
- Power requirements: 5VDC @180mA max

Package Dimensions

- 8.5 x 10.75 x 4.75 (inches)
