Short Description

Hexagon socket screws for mounting of fans, radiators and much more. By using hexagon socket screws a

clean design is ensured and damaging of the screw head is virtually impossible. The conformity with DIN promises hassle-free transfer to any technical application.

Description

Hexagon socket screws for mounting of fans, radiators and much more. By using hexagon socket screws a clean design is ensured and damaging of the screw head is virtually impossible. The conformity with DIN promises hassle-free transfer to any technical application.

The variety of finishes offer a whole new array of design possibilities!

These screws should only be used in combination with a fan-/ radiator grill as the screws are too long for just the radiator and may hence damage it!

Compatible with (amongst others):

All NexXoS, Magicool, Airplex, Thermaltake, Innovatek, Koolance, Phobya and EK Waterblocks radiators

Specifications

- Material: Steel
- Colour: Black nickel
- Thread size: M3
- Accuracy class: according to DIN 912
- Shaft length: 50mm
- Thread length: 30mm
- Overall length: 52mm
- Head diameter: 4.5mm

Extent of delivery:

- 4x Screw DIN 912 M3 x 50 hexagon socket - black nickel

Please note:

Screwing the screw in too far may damage the radiator, please ensure that the screw has the proper length for your application! This screw may not fit for all applications!
