Short Description

Product Details:

Phobya's latest marvel of cooling Technology!

A fan of both Silent lovers and friends of the performance-optimized system addresses is an absolute novelty in the cooler segment. But this split and still have more talent than fans of other pale with fear, "Fear it!"

The consortium of manufacturers' Phobya "it has achieved through optimum alignment of the blades that increased air flow does not necessarily lead to higher noise levels. The rotor blades are curved in combination with the wedge-shaped alignment of the camp to show the context, the future starts here! The camp combines sash and frame to a minimum point, the drive through coils, ensures that this is almost noiseless, silent fans know what really appreciated. By increasing the speed, here was an air flow rate reached it's so rare!

At a speed of 1100rpm and the latest fan is audible. Therefore, this fan has been designed so that even he has to make do with less tension good. For a start voltage range from 7-12V, this fan will be quieter than a gnat, yet the system is still held by a strong air current is very cool! The scope of supply for the reactors of the same speed, even included a matching cord. This reduces the voltage at 7 volts, depending on taste. All cables are black gesleevet, demonstrating the appearance of the fan.

The look is another point which takes in addition to functionality, a high weighting. Red Wings leaves with elegant black frame to create the completely matte look, with red LEDs inside an eye-catcher in the system where each user can say to himself: This fan is a good choice!

Technical details:

Dimensions: 120 x 120 x 25mm

Color: transparent framework, blue blades and blue LEDs

Weight: 119g

Rated Voltage: 12V

Start voltage: 5 V

Power consumption: 0.2 A

Rated speed: 1500rpm (+ / -10%)

Airflow: 97,20 CFM / 57.22 CFM

Noise level: 25 dB / A

MTBF (25 ° C): 50000 hours

Connector: 3 Pin

Max Static Pressure: 1.61 mm-H2O

Feature: Lighted with 4x blue LEDs

Delivery:

1x G-Phobya Silent 12 1500rpm Blue LED (120x120x25mm)
