

Aquacomputer aquaero 5 LT USB Fan-Controller

\$65.75

Product Images

Description

The aquaero is an absolutely autonomous working microprocessor-controlled device with USB 2.0 interface. All speed parameters and sensor values can be set and visualized in an user-friendly PC-software.

***PLEASE NOTE and be aware that all RMA and tech support for this product is ONLY direct through Aquacomputer. We will

not warranty through our shop any Aquaero products. Be advised that Aquacomputer is in Germany and so any RMA would have to be sent to them directly. If you do not accept these terms then please do not purchase Aquaero. The reason for this is many customers are overloading the circuitry and burning up the controllers and we will not be responsible for replacing any more of these units through PPCS. ***

Several aqua computer products can be used to expand the functionality of the aquaero 5 Controller. These expansions are dynamically mapped into the device, creating a consistent control system rather than individual devices.

In maximum configuration, the following devices can be connected to an aquaero 5 simultaneously:

- Two aquastream XT pumps
- Six poweradjust 2 controllers
- One tubemeter
- Two multiswitches

Features

The key features of the aquaero 5 include:

- Programmable four channel fan controller
- USB 2.0 and aquabus interface
- Four fan outputs with current measurement
- Versatile control options
- Eight temperature sensor inputs
- Flow sensor input
- Output for IR transmitter
- Three LED outputs
- Potential-free switch
- Two additional power outputs
- Extensive alarm options
- Acoustical alarm
- Speed signal output for status evaluation
- Expandable to a maximum of 10 fan channels

Specifications

Extent of delivery:

- aquaero 5 LT controller
- four temperature sensors, length approx. 70 cm
- one internal USB cable, length approx. 100 cm
- one connection cable for speed signal or aquabus
- manual
- mounting material

Additional Information

Brand	Aquacomputer
SKU	AQ-53095
Weight	1.0000
Msc Watercool	Controller
Vendor SKU/EAN	4260073413541
