

Phobya Anti-Twist Adaptor G1/4" Inner Thread to G1/4" Inner Thread - Silver Nickel

\$3.85

Product Images

Short Description

Product Details:

Phobya connector element with 2x G1/4" inner threads with integrated bearing for many applications. Prevents hose twisting!

The special feature of this connector piece is the "Anti-twist" element. As hoses tend to twist themselves whilst fastening union nuts or bending them in large radii Phobya now offers a solution! The integrated bearing allows free spinning of the two knurled connector ends which prevents the hoses from twisting and therefore kinking which often massively reduces or even stops the flow in watercooling systems.

Technical specifications:

Inner thread G1/4" to inner thread G1/4"

Material: Silver nickel plated brass

Length: 30mm
Inner thread depth: 8mm

Extent of delivery:
1x Phobyas Anti-twist adaptor G1/4" inner thread to G1/4" inner thread - silver nickel
