Short Description

As digital media becomes popular and HD audio/video contents become available in living rooms and on PCs, there are more and more demands for storage. At this point, storage peripherals must be equipped with a high-speed interface.

Description

As digital media becomes popular and HD audio/video contents become available in living rooms and on PCs,

there are more and more demands for storage. At this point, storage peripherals must be equipped with a high-speed interface. In addition to time saving and increased efficiency, a high speed interface can be environmentally friendly, because less operating time leads to less energy consumed. Enclosed within an aluminum high speed 3.5" HDD external enclosure, MUKii' s Light-Speed TIP-375U3 features a high speed USB 3.0 interface, which supports a transmission rate of up to 5 Gbps. Our unique LCD display shows the transmisson speed, keeping you being informed of the transmission status. It passed the most rigorous HDD compatibility test and is compatible with all commercial 3.5" SATA HDD/SATA SSD. Its dedicated power adapter provides clean and stable power to your HDD to ensure data safety and error-free reading during high speed transmission. The vertical stand allows you to place it where you want to save your desk space. The extra bonus MUKii HDD utility provides an unprecedented user experience and features USB Turbo/HDD Auto Partition/Smart Power Saving/Auto Backup/Disk Info Report, allowing you to get the most out of the product. The premium glossy finish not only has superior ventilation, but also looks sleeker. MUKii' s Light Speed TransImp Series HDD external enclosure is comprehensively designed based on the needs of time saving/power saving/safety to satisfy all of your data transmission needs.

Features
