Description

MUKii officially launched the “TransImp Series - SATA to USB 3.0 Cables” to satisfy customer’s high-speed connection requirements to various SATA storage peripheral items. TransImp Series - SATA to USB 3.0 Cables support various 2.5"/3.5"/5.25" SATA I/II HDD/SSD and other SATA devices, making the storage device setup procedures much easier. With the plug-and-play USB 3.0 interface, you can easily connect your storage device to PC for data access at a transfer rate of up to 5 Gb/s. The power adapter that complies with international safety standards and its separate power switch ensures sufficient power supply for proper high-speed data transmission (reading/writing). The value-added bonus: MUKii M One System simplifies the user

experience! This software program features: USB Turbo/HDD Auto Partition/Smart Power Saving/Auto Backup/Disk Information Report, allowing you to use this product more efficiently and effectively. MUKii' s TransImp Series Cables are comprehensively designed to satisfy your data transmissions needs for Saving Time/Power & Safety.
