Description

The Transformer 3 CPU cooler has the shining silver look that is the special feature of Transformer series. The design of the three 6mm heat pipes in V shape increases the airflow and improves the cooling performance.

Transformer 3 uses one 12 cm fan and aluminum fins that can rapidly take the heat away. Additionally, H.D.T Tech and the fan with PWM function that can automatically control and adjust the fan speed up to 2200RPM by detecting the CPU temperature in order to successfully dissipate the heat. Moreover, it remains noiseless at 15dBA. An additional fan can be added according to user's needs.

Besides PWM function, the shock absorption rubber nail design of Transformer 3 reduces the shake and lowers the noise to provide extremely quiet cooling. Additionally, clips for Intel and AMD provide great compatibility.

Features

- The three Ø6mm heat pipes in V shape and the special fins design effectively increase airflow and cooling performance.
- Equipped with a 12cm PWM fan provides a silent and good performance; one additional fan can also be added.
- Shock absorption rubber nail design reduces both vibration and noise.
- It is compatible with Intel and AMD.

Specifications

Outline Dimension	130 x 161 x 78.5 mm
Fan Size	120 x 120 x 25 mm
Heat Sink Materials	Aluminum Fin + Heat-pipes
Rated Voltage	12 VDC
Rated Speed	800±25%RPM ~2200±10% RPM
Noise Level (FAN)	<15~<35 dba="" font="">
Bearing Type	EL Bearing

Weight	0.63 kg
