Short Description

Trick out your case with this 6" colored LED light. The Bubble Light features similar technology to the color fan grills but in a 6" acrylic tube form. This unit features a dual inverter, on/off toggle switch, and a PCI variable display button. The variable display button allows for different display outputs of the color LEDs from strobe action, slow strobe transition, and glowing on/off.

Description

Currently branded Extreme Gamer

Trick out your case with this 6" colored LED light. The Bubble Light features similar technology to the color fan grills but in a 6" acrylic tube form. This unit features a dual inverter, on/off toggle switch, and a PCI variable display button. The variable display button allows for different display outputs of the color LEDs from strobe action, slow strobe transition, and glowing on/off. These lights are able to be hooked up with all Meteor Light and Bubble Light Kits (12 VDC inverters). Each kit comes with single bubble sticks, optional for pair or sound control module. Once you connect a sound control module it will run up to two sets(4 bubble sticks). Each bubble kit includes 8 different changes by 3 LED's. Accessories include Velcro with adhesive backing, PCI switch, and dual inverter.

All light cables are full covered in Premium Sleeving and Heatshrink, colors of your choice.

Features

- 8 speed settings, from slow to fast
- 3 LED
- Sound control module (optional) off/on/sound control/flash
- Great illumination
- Super bubble effect
- Easy install plug and play

Specifications

- 12 VDC
