

Aquacomputer Passive Cooler for Aquaero 5 (New Version - 20mm High)

\$11.95

Product Images

Short Description

Mounting of this heatsink on an aquaero 5 increases heat dissipation from the power components, hence increasing the possible power output from the fan channels. On the aquaero 5 XT this heatsink is already included and mounted on the controller, all other versions can be upgraded easily with this kit.

Description

Mounting of this heatsink on an aquaero 5 increases heat dissipation from the power components, hence increasing the possible power output from the fan channels. On the aquaero 5 XT this heatsink is already included and mounted on the controller, all

other versions can be upgraded easily with this kit.
