\$4.49

## Product Images

## Short Description

A Y-cable from a 4pin Molex connector on 1x 3pin and 2x 4 pin (PWM) (12V).

## Description

---

### Product Details

A Y-cable from a 4pin Molex connector on 1x 3pin and 2x 4 pin (PWM) (12V).

For connection of up to 3 fans to 1x 3pin and 2x 4 pin (PWM) ports (CPU cooler, case fan, etc.) to power supply connectors (4-pin Molex). The trick here is that the 4 pin molex connector is looped through. You lose so no molex connector of your power and do not need further splitting!

## Features

---

Sleeving:

This cable is not only useful but also very visually appealing. To the overarching network that wraps the actual cable is very tight and this is precisely the effect which the Profisleever: Complete reconstruction of the cable in order to emphasize the uniqueness of its system even better! Particular attention was paid to the combination of the cable jacket (the sleeve), the plug, and the shrink tubing, that they paint a consistent picture.

Sets:

Phobya's goal is to give amateur and professional case modders here a bit far to come forward. Sleeving is like a lot of work and costs a lot of time, so you can now convert to the cables of Phobya his entire system just as you would like, just by simply changing cables.
