

Alphacool Laing DDC Acetal Top

\$16.99

Product Images

Short Description

This cover is designed to replace the original cover of the Laing DDC pump to allow use of G1/4" fittings. With the help of decoupling kits (decoupling category) the Laing can be installed completely decoupled in 3.5" drive bays respectively on the case floor with standard decouplers. It is even possible to install the pump instead of an 80mm fan. With this cover a multitude of mounting possibilities is given, your imagination is the limit for your projects!

Description

The perfect cover for the Laing DDC pump.

This cover is designed to replace the original cover of the Laing DDC pump to allow use of G1/4" fittings. With the help of decoupling kits (decoupling category) the Laing can be installed completely decoupled in 3.5" drive bays respectively on the case floor with standard decouplers. It is even possible to install the pump instead of an 80mm fan. With this cover a multitude of mounting possibilities is given, your imagination is the limit for your projects! A further opening is intended for the optionally available reservoir. With this option the cover can be used as a fully functional reservoir, still permitting the use of versatile decoupling options.
