Product Images

Short Description

Product Details:

Universally compatible fillport for watercooling systems. The fillport can easily be connected to the reservoir with a hose and allows comfortable refilling and deaeration without having to disassemble the PC. The fillport can be installed e.g. in the top of the case and can easily be reached. The integrated O-ring allows a flush fit in the case and also seals the Fillport tightly.

Installation:

- Cut a 1" hole (2.54cm) in the top or side of your case
- Push the fillport into the hole
- Secure the fillport with the plastic counter nut from inside of the case
- Connect the hose with the reservoir or t-piece fitting
- Secure the hose with a hose clamp or zip tie

Specifications:

Material: Plastic

Thread: G1/4" (please order hose fitting separately)

Length: 25mm (without fitting)

Delivery:

Fillport with locking screw, O-ring and nut
