Short Description

ModMyToys 8-Pin Power Distribution PCB is the perfect organizational solution for hard core modder's, water cooling enthusiasts and other power users that use a large amount of cooling fans in their systems or servers. FINALLY a use for those unused 8-pin PCI Express 2.0 cables on your PSU! Why use clumsy Y splitters that just add to cable clutter when you can have a clean point to distribute power to all your 3-pin fans? These small PCB's are made of the highest quality and include an easy to install preinstalled black mount rail and Velcro strip.
