Short Description

Great new ModMyToys version powder-coated black PCI bracket with rocker switch and large LED! This extremely useful switch can be mounted in an empty PCI slot and control any electronic needs including lighting and fans. If you don't want your switches to be visible or you don't want to drill a hole in your case, then this is the switch for you! This can replace boring cathode PCI switches that don't have LED's and replace with an easy to see rocker that is great to see in the dark!

Description

Great new ModMyToys version powder-coated black PCI bracket with rocker switch and large LED! This extremely useful switch can be mounted in an empty PCI slot and control any electronic needs including lighting and fans. If you don't want your switches to be visible or you don't want to drill a hole in your case, then this is the switch for you!
