

# Phobya Radiator Mounting Set M3 with Decoupling - 4 Piece Set - Black

\$5.99

## Product Images

## Short Description

Unique uncoupling of the radiator fan and housing assembly! Such a thing has never happened before: A decoupling brings the advantages of a screw and yet so unique decoupled as rubber mounts. Phobya's developers have devised a solution to a problem which everyone would like to know from being eradicated, the entire vibration-free mounting of fans on the radiator and the housing.

## Description

---

Unique uncoupling of the radiator fan and housing assembly!

Such a thing has never happened before: A decoupling brings the advantages of a screw and yet so unique decoupled as rubber mounts. Phobyas developers have devised a solution to a problem which everyone would like to know from being eradicated, the entire vibration-free mounting of fans on the radiator and the housing.

The solution is a multiple rubber padding. It begins with the bottom half of the screw is screwed into the radiator and there with a rubber washer already the first time is decoupled. Next, the shaft on which the fan is held in the focus of attention. Here a type of rubber sleeve has been developed which separates the entire bearing surface of the fan of the metal screw. The mother, to mount the fan finally, is also mounted vibration-free with a rubber washer. Thus, the mounting screw is completely attenuated and no vibration from the fan may be on the radiator housing or passed on. But that's not enough Phobyas! The sites might lie where the fan as well, or if they do not escape into the air stream which could be also included, provided with a vibration damper, and the last little problems is also solved.

Ultra Silence, decoupling with the highest level Phobyas radiator mounting kit!

## Specifications

---

- Material: metal and rubber
- Color: black
- Thread Size: M3
- lower threaded length: 5mm
- Upper Shaft length: 30mm
- top thread length 10mm
- Optimal fan size (L x W x H): 120 x 120 x 25mm
- Vibration damper (L x W x H): 120 x 120 x 2mm
- (Optional, not included, even for 140mm fan)
- Dimensions nut (D x H): 7 x 10mm

### Delivery:

- 1x vibration damper
- 4x mounting screws
- 4x mounting nut
- 8x washers, 4 x black, 4 transparent

Note: We have noticed in the assembly, as for example Screw-thread and radiator are both painted the little screw that is difficult. We recommend "free cut" with another screw thread of the radiator and tighten the nut with the threads of the Entkopplerschrauben and solve again.
