

Custom 1/8in. Acrylic Window Panel for Corsair 800D - Clear w/ Dual 120mm Holes

\$44.95

Product Images

Short Description

So you have yourself a Corsair Obsidian 800D? Good. But have you ever dreamed of getting more out of the case? Perhaps addressing the "Achilles' heel" of that otherwise-awesome case by adding intake fan holes to get more airflow over your beastly GPUs? Well, dream no more! We now have 'em!

Description

So you have yourself a Corsair Obsidian 800D? Good. But have you ever dreamed of getting more out of the case? Perhaps addressing the "Achilles' heel" of that otherwise-awesome case by adding intake fan holes to get more airflow over your beastly GPUs? Well, dream no more! We now have 'em!

These are direct drop-in replacement panels for the case; swap out the acrylic panels and enjoy the new enhanced 800D brought to you exclusively by Performance-PCs!

We recommend using 120mm fan filters such as [Filterright 120mm filters](#) or [DEMCIfilters](#) (Note: No dual-120mm model DEMCI filters fit the configuration/spacing on these panels.)
