

Custom 1/8in. Acrylic Window Panel for Corsair 800D - Clear w/ Single 200mm Hole

\$44.95

Product Images

Short Description

So you have yourself a Corsair Obsidian 800D? Good. But have you ever dreamed of getting more out of the case? Perhaps addressing the "Achilles' heel" of that otherwise-awesome case by adding intake fan holes to get more airflow over your beastly GPUs? Well, dream no more! We now have 'em!

Description

So you have yourself a Corsair Obsidian 800D? Good. But have you ever dreamed of getting more out of the case? Perhaps addressing the "Achilles' heel" of that otherwise-awesome case by adding intake fan holes to get more airflow over your beastly GPUs? Well, dream no more! We now have 'em!

These are direct drop-in replacement panels for the case; swap out the acrylic panels and enjoy the new enhanced 800D brought to you exclusively by Performance-PCs!

We recommend you add one of our [DEMCifilters in 200mm](#) configuration or a [Filterright 200mm filter](#) to keep your set-up dust-free.

Note: 200mm fans verified compatible -- Corsair branded models, BitFenix models.
